- ➔ Protective barrier prevents surface contamination for **5 days**
- ➔ Non-toxic formula—**deodorizes & purifies the air**

Learn More about Nano Hope's Surface Cleaner + Defense Barrier

1.

How does Nano Hope simplify cleaning routines?

Nano Hope's patented hydrogen peroxide-based formula is powerful yet safe—removing 100% of surface contamination on everything from treatment beds and saunas to locker rooms and reception areas. It's non-corrosive, gentle on high-end finishes, and replaces multiple products—saving time and reducing supply costs.

2.

Does Nano Hope remove all pathogens and odors?

Yes! Nano Hope is effective against bacteria, viruses, mold, and fungi—making it ideal for humid, high-traffic areas. It also purifies the air and neutralizes body odors, all while being gentle enough for people with sensitive skin and allergies.

3.

Is Nano Hope safe to use around clients?

Nano Hope's patented hydrogen peroxide-based formula is non-toxic, biodegradable, and alcohol-free. It is tough on germs, yet gentle on all surface types. It leaves no residue or irritation and was thoughtfully created with the health of your clients, your team, and the planet in mind.

4.

What makes the protective barrier so effective?

Our advanced nano barrier technology creates a non-stick layer that repels oils, product residue, and grime—so surfaces stay clean for up to 5 days! It's invisible, yet leaves a polished, high-end finish that maintains your space between services.

5.

How is Nano Hope better than our current cleaner?

Most cleaners only remove residue temporarily—Nano Hope does more. It cleans and leaves behind a nano-shield that repels product buildup, body oils, and germs for up to 5 days. That means fewer deep cleans, faster wipe-downs between clients, and longer-lasting freshness. Plus, it works on everything from reception areas to plunge baths—streamlining your cleaning routine with one powerful product!
