- ➔ One application keeps surfaces clean for up to **5 days**
- ➔ Gives stainless steel a **streak-free shine & prevents fingerprints**
- ➔ Cleans all surfaces to meet **medical-grade hygiene standards**

Learn about Nano Hope's Non-toxic Products

1.

Is Nano Hope safe to use around people & food?

Nano Hope's patented formula is non-toxic and residue-free, breaking down into water and oxygen after use. It's safe for residents, staff, and pets, and can be used on food-contact surfaces, children's play areas, and throughout residential and common areas without risk to sensitive populations.

2.

Can we use it on luxury finishes and delicate surfaces?

Yes. Nano Hope is safe for marble, granite, quartz, wood, tile, stainless steel, mirrors, fabric, and electronics. It won't discolor, etch, or corrode finishes, and can be used for spot cleaning carpets and upholstery without leaving marks or rings.

3.

How does it perform compared to traditional cleaners?

Most cleaners remove grime temporarily. Nano Hope cleans and forms a protective surface barrier that prevents soil load buildup for up to five days. Nano Hope extends time between cleanings and supports more efficient maintenance operations.

4.

How does Nano Hope reduce cleaning complexity for our teams?

Nano Hope reduces complexity with fewer SKUs and broad surface compatibility, helping maintenance and housekeeping teams work faster and more consistently. Less switching, fewer mistakes, easier training, and stronger performance across the property.

5.

Does Nano Hope eliminate odors?

Yes. Nano Hope doesn't just clean surfaces, it neutralizes odor at the source. It's ideal for trash chutes, trash rooms, bathrooms, pet areas, and other high-odor environments where lingering smells impact the experience of residents, staff, and guests.
