- ➔ Cleans all surfaces to meet **medical-grade** hygiene standards
- ➔ Protective barrier prevents surface contamination for **5 days**
- ➔ Non-toxic formula—safe **for food, customers & employees**

Learn More about Nano Hope's Surface Cleaner + Defense Barrier

1. *How does Nano Hope simplify cleaning a busy restaurant?*

Nano Hope's patented hydrogen peroxide-based formula is both powerful and safe—removing 100% of surface contamination on everything from prep stations and tables to restrooms and refrigerators. It replaces multiple products, streamlining cleaning and reducing supply costs.

2. *Does Nano Hope remove all pathogens and odors?*

Yes! Nano Hope is 100% effective against bacteria, viruses, mold, and fungi—making it ideal for both back-of-house prep areas and front-of-house dining spaces. It purifies the air, neutralizes odors, and is gentle enough for people with sensitive skin and allergies.

3. *Is Nano Hope safe to use around guests and food?*

Absolutely. Our hydrogen peroxide-based formula is food-grade safe, non-toxic, biodegradable, and alcohol-free. It's tough on germs but leaves no harmful residue or fumes—and was thoughtfully developed with the health of your guests, staff, and food safety in mind.

4. *What makes the protective barrier so effective?*

Nano Hope leaves behind an invisible nano barrier that repels grime, oil, and sticky residue—keeping surfaces clean for up to 5 days. From stainless steel appliances to high-touch surfaces and restrooms, the barrier reduces buildup between cleanings and preserves that “just-cleaned” look across your space.

5. *How is Nano Hope better than our current cleaner?*

Most cleaning products only remove dirt temporarily—Nano Hope does more. It cleans and leaves behind a protective shield that keeps surfaces cleaner longer, reducing the need for constant reapplication. Instead of juggling separate products for dining areas, kitchens, and restrooms, Nano Hope does it all with one safe, effective solution.
