

Nano Hope for Convenience Stores

5 Day Surface Barrier Protection

Long-Lasting Clean Unmatched Performance

Safe for all surface types

From drink stations to gas pumps and restrooms, our **non-corrosive formula** is safe for every surface in your store

5-Day Invisible Barrier

Non-toxic formula protects surfaces from buildup, splatter, and sticky residue for up to **5 days**

Eliminate fingerprints

Repels fingerprints to create a 5 day shine on glass, mirrors & stainless steel

Faster Cleaning Operations

Fewer products reduce training time, minimize errors, improves efficiency & **decreases cleaning costs by 20%**

From Gas Pumps to Drink Stations —We've Got You Covered

- ✓ Save money with an **all-in-one product** that streamlines cleaning
- ✓ **Streak-free shine** that lasts 5 days—even in high-traffic areas
- ✓ Cleans all surfaces to meet **medical-grade** hygiene standards
- ✓ **Non-corrosive**—safe for electronic scanners & touch screens
- ✓ Non-toxic formula—safe **around food, customers & employees**

Learn More about Nano Hope's Surface Cleaner + Defense Barrier

1.

How does it perform compared to traditional cleaners?

Most cleaners remove grime temporarily. Nano Hope cleans and forms a protective surface barrier that helps prevent grime from reattaching for up to five days. This extends time between cleanings and supports more efficient facility maintenance.

2.

Is Nano Hope safe for equipment and delicate finishes?

Yes. Nano Hope is safe for stainless steel, glass, tile, workstations, equipment, mirrors, and electronics. It won't discolor, etch, or corrode finishes and leaves stainless steel surfaces streak-free and fingerprint-resistant.

3.

Is Nano Hope safe to use around food, customers, and staff?

Nano Hope's patented nanotechnology is non-toxic and residue-free, breaking down into water and oxygen after use. It's safe for employees, and facility teams, and can be used on food-contact surfaces and shared workspaces without risk to people in the environment.

4.

What makes the protective barrier so effective?

Nano Hope leaves behind a non-corrosive nano barrier that repels grime, sticky residue, and oil for up to 5 days. Safe for use on scanners, touchscreens, and card readers, it protects high-touch areas like soda machines, countertops, and gas pumps —keeping all surfaces cleaner with less effort.

5.

How does Nano Hope reduce cleaning complexity for our teams?

Nano Hope reduces cleaning complexity by replacing multiple products with fewer SKUs and working safely across many surface types. This helps teams clean faster, reduces product switching, simplifies training, and improves consistency across large facilities.
